

BRUNK
PLASTIC SERVICES

DEPENDABLE & ACCOUNTABLE

**Pulverizing, Compounding, Warehousing,
Bulk Transportation & Storage**

Exceptional Value And Service

Brunk is a leader in pulverizing, pushing the limits of what's possible. Our two facilities expertly serve plastic distributors, rotational molders, color masterbatch producers and other industries. We're a one-stop shop with an unrivaled combination of pulverizers, rail access, massive rail car storage, warehouse services and a huge fleet of tractor trailers. So when you need these high-quality plastic services, the only name you need to know is Brunk. High capacity. Fast turnaround. Cost Effective. Customer focused.

TWO LOCATIONS offer a wide range of warehousing, freight and distribution options, including service from the Norfolk Southern Railway and the Canadian Pacific Railway.

Toll Pulverizing

Quality & Experience

Turn pellets into powder
without compromise.

Brunk Corporation started pulverizing for the rotational molding industry in 1994 and has since become a proven leader in the pulverizing industry. Brunk runs its facilities 24 hours a day, 7 days a week. With this schedule Brunk can ensure prompt and immediate turn around of your product.

Warehousing

Flexibility & Capacity

Repackaging and storage to protect
your timeline and your bottom line.

Compounding

Innovative & Expertise

Any color. Every possibility.

It's extremely important that you choose a company that understands plastic extrusion and reprocessing and will take the time to listen and work with you to produce a quality product at the lowest overall cost.

Transportation

Range & Scale

Your product. Where you need it
and when you need it.

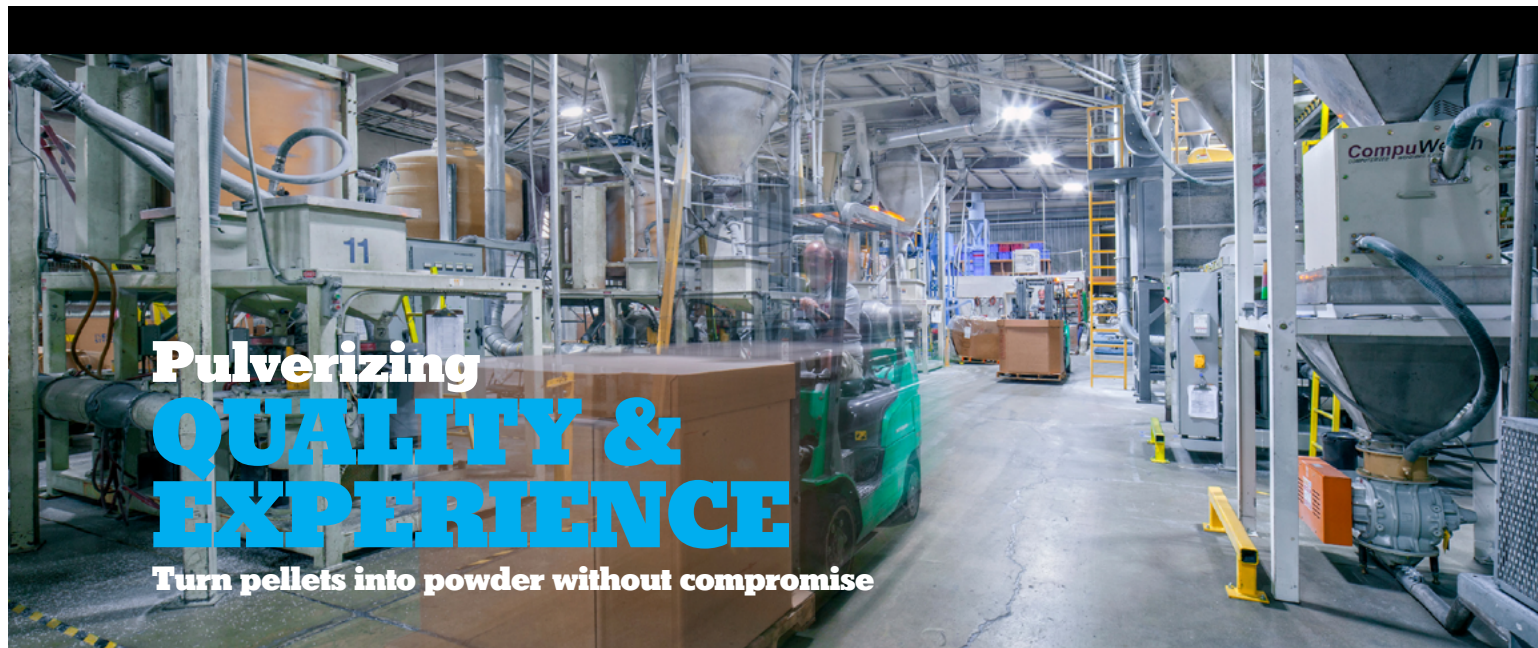

Bulk Storage

Capacity & Location

Huge railcar capacity for pellets and
silo storage for powder.

Our onsite storage in Goshen and Bloomington of 200 cars and 30 silos ensures that your material is ready when needed, in quantities which gives you flexibility in the marketplace to buy or sell cost effectively.

A Proven Leader

There are no shortcuts when it comes to pulverizing. You want cutting-edge machinery, a high capacity material handling system, unwavering quality, the latest laboratory equipment and people with the training, experience and dedication to get the job done right. And that's what you'll find at Brunk. We have the storage capacity in rail cars and silos for both pellets and powder and over 20 pulverizers at our two locations. And that's why we're able to deliver the highest quality powder – tailored to your specifications – on-time and every time.

Our laboratory boasts precision equipment and experienced technicians to test your product throughout the entire process.

We Can Pulverize A Wide Range Of Materials:

Natural PE
Nylon
Polycarbonate

Black PE
Acetal
TPU

Colored PE
ABS
Polypropylene

Reprocessed PE
Polystyrene
PLA

“Brunk has been one of our leading pulverizing sources for the last 5 years for many Styrenic products. They always do a great job providing service and support to Ineos Styrolution.”

- Thomas Hazenstab, Specialties Business Director, Ineos Styrolution

Transportation **RANGE & SCALE**

Your Product. Where you need it and when you need it.

By Road or Rail

Nobody moves pellets and powder like Brunk Transport. In fact, our pulverizing and bulk transportation services are joined at the hip, to bring powder to your silos when you need it. Our fleet of 20 large “cube” trailers stands ready with vacuum pneumatic units to handle virtually any requirement. Our locations are also served by two of the region’s most efficient and reliable rail systems – the Norfolk Southern Railways and the Canadian Pacific Railways. So when you need product, Brunk delivers – on time, safely, in specification, and supported by a staff of experienced material handlers.

All of our trailers are self-loaders, making deliveries easy.

“On any given day, we depend on Brunk Transport’s MN and IN locations to pull, stage, and ship within the U.S. and inter-Canada. It is always a pleasure to work with their attentive, thorough, and all around great staff with the “WILL-DO & CAN-DO” approach. Brunk Transport can always be counted on to go above and beyond to ensure our customers receive exceptional service by delivering their product in a timely manner.”

- Michell Hill, Logistics Coordinator, Ravago Americas

Tailored To Your Needs

Brunk has the capability to handle virtually any warehousing service need. Besides the storage of your product in bags, boxes or supersacks, we provide pack-out services from bulk to gaylord box or supersack, deboxing pellets or powder to bulk, and debagging 50 lb bags to bulk. These services are not only provided to meet your customer’s specific packaging requirements from your bulk or box inventory, but even when your railcars need to be emptied before you start incurring demurrage charges. Our warehouse team is always ready with minimal lead times, giving you peace of mind that when you store your plastic resin at Brunk, we can repackage it they way you need it, when you need it.

Warehousing	Goshen, IN	Bloomington, MN

Bulk Storage **RAILCAR & SILO STORAGE**

The storage you need when you need it

Large Storage Capacity

Our onsite storage in Goshen and Bloomington of 200 railcars and 30 silos ensures that your material is ready when you need it, in quantities which gives you the flexibility in the marketplace to buy or sell cost effectively. And it gives Brunk the flexibility to pulverize different products simultaneously into different silos, which helps reduce lead times so that our customers get their product when they need it. Together with Brunk Transport's tractor trailer fleet of 20 units, and our warehouses, we are here to serve.

Our onsite storage in Goshen, IN and Bloomington, MN of 200 cars and 30 silos ensures that your material is ready when needed, in quantities which gives you flexibility in the marketplace to buy or sell cost effectively.

What Makes Brunk Unique?

We're highly experienced, customer-focused and take pride in what we do. For over 60 years, including 25 in the world of pulverizing for rotational molding, Brunk has been leading the way as a one-stop shop for pulverizing, warehousing, rail car storage and bulk transportation. Our two locations in Goshen, IN and Bloomington, MN blanket the Midwest and our coverage extends throughout the country. With all of these services – as well as our newest compounding line – we're a model of efficiency and simplicity. It's a unique combination that's unrivaled in scale, delivering real savings to our customers and providing something few other companies can...peace of mind. Our typical lead times for pulverizing and powder deliveries are between 2 and 10 days, and are 2 to 3 days for pellet transload deliveries. When you ask, Brunk delivers.

Our Locations

Our corporate office is in Goshen, Indiana – 135 miles east of Chicago and 140 miles north of Indianapolis. Our second facility is in Bloomington, Minnesota, near Minneapolis. Both of our facilities are strategically located in two major industrial areas to provide a logistical advantage to our customer base.
